RIPPON & BURTON'S FURNISHING IRONMONGERY WAREHOUSES, 12, WELLS STREET, OXFORD STREET, LONDON.

CATALOGUE OF ARTICLES, which, if purchased for Town, must be paid for on delivery; if for the Country, or for Exportation, the money must be remitted, postage free, with the order. On any other terms RIPPON & BURTON respectfully decline doing business at the Prices herein named.

The PERFECT SUBSTITUTE for SILVER.

CATALOGUE, with ENGRAVINGS (Gratis). POSTAGE FREE.—The celebrity of the rich and silvery appearance, and extreme durability of the material, made exclusively by ourselves, has induced many attempts to foist upon the public the notoriously deleterious German Silver, under the guises of "Albata Plate," "Berlin Silver," "Victoria Silver," &c. &c., against which we especially warn them. Aided by an eminent Chemist, we have succeeded in purifying our material so that acids do not affect it; it is now so well known and appreciated, that it is universally superseding silver in all its uses. The genuine metal, which is more durable than silver, can only be had at our warehouses. It is the same throughout, and can be engraved and made in all the various articles that are in silver, from which it can only be told by reference to the stamp.—Engraving letters, in any style, 2d. each; crests, 6d. each.

THE VESTA STOVES,

Protected by Royal Letters Patent.

THE ADVANTAGES of the CHUNK PATENT STOVE are similar to those of the VESTA, entire freedom from dust or smoke; very great economy of fuel; and perfect safety from fire. It has no door, and does not produce any of the unpleasant effects upon the atmosphere which have been experienced in the use of all others except the Vesta. It has been found a source of great comfort in the bedroom of the invalid, affording a uniform temperature throughout the day and night, with only one supply of fuel, and without attention; while the most delicate chemical test cannot detect anything arising from its use which is injurious to health. As there is no fire or heated substance in contact with the outer case of the Stove, it merely warms the air without decomposing it; and as there is no door, none of the gases generated can pass into the apartment, and that dryness of air produced by the use of all others (except the Vesta) is entirely avoided. Price, Plain, 60s.; Fluted, 70s.

For detailed particulars of the Stoves (as well as for many Testimonials of their completeness and efficiency) see RIPPON & BURTON'S "PRICE CURRENT," 45 and following pages: it also contains Engravings and Prices of every Ironmongery article necessary to the furnishing of a house of any size, 25 per cent under any other old-established House, and will be sent (gratis) post-free, in answer to a post-paid application.
